>>> The Rule of Least Power

When designing computer systems, one is often faced with a choice between using a more or less powerful language for publishing information, for expressing constraints, or for solving some problem. This finding explores tradeoffs relating the choice of language to reusability of information. The "Rule of Least Power" suggests choosing the least powerful language suitable for a given purpose.

Règles du jeu

- 1. Texte
- 2. HTML (sémantique) & CSS (layout, style, animations simples)
- 3. SVG (formes et animations complexes)
- 4. JavaScripts

... mais il y a toujours de bonnes raisons pour ne pas suivre ces règles

Le CSS c'est vaste

- Selectors
- Box model
- Float
- Media Query
- Transitions
- Gradients

- Responsive Design
- Media
- Variables
- Colors
- Shapes
- ...

- I. Utiliser un pré-processeur?
- II. Unités
- III. Flexbox et Grid
- IV. Pseudo éléments
- V. Animations
- VI. Pseudo classes d'état
- VII. HTML
- VIII. Compatibilité des navigateurs
 - IX. Conclusion

Utiliser un pré-processeur?

```
button {
  background: lightblue;
  border: medium solid purple;
}
button.danger { /*
  background: salmon;
  color: rebeccapurple; */
}
```

#8

Oui, mais privilégiez:

- le CSS
- les post-processeurs

- CurrentColor < https://css-tricks.com/currentcolor/>
- → background-origin

https://developer.mozilla.org/fr/docs/Web/CSS/background-origin

CSS Variables (aka Custom Properties)

https://www.w3.org/TR/css-variables/

• ► CSS Color Module Level 4 https://www.w3.org/tr/css-color-4/>

Unités

Une histoire d'unités CSS

CommitStrip.com

→ CommitStrip http://www.commitstrip.com/fr/2016/10/10/a-story-about-css-units/>

Les unités de longueur

px, cm, pt, ... longueurs absolues (mesure physique)

em, rem fonction de la font-size

ex, ch hauteur d'un x, largeur d'un 0

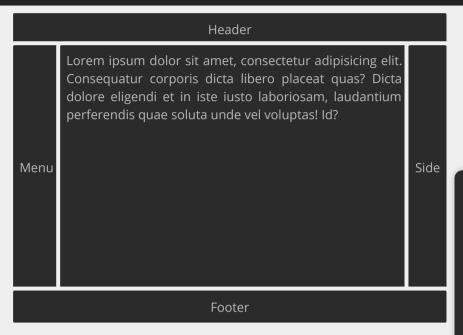

vh, vw (100vh, 100vw) = (hauteur, largeur) du

viewport

vmin, vmax min(1vh, 1vw), max(1vh, 1vw)

Holy Grail avec calc

#13

Pseudo éléments

Le dinner d'un philosophe

```
#19
```

```
.table {
  color: gray;
  font-size: 5em;
  /*content: '';*/
}
```

Triangle avec des bordures

```
div.top, div.right, div.bottom, div.left {
   border: 1em solid transparent;
   display: inline-block;
   box-shadow: 0 0 0 .1em transparent;
}

div.top { border-top-color: transparent; }
   div.right { border-right-color: transparent; }
   div.bottom { border-bottom-color: transparent; }
   div.left { border-left-color: transparent; }
```

```
.popover {
   position: relative;
   background: teal;
}

/*.popover::before {
   position: absolute;
   z-index: 0;
   content: '';
   top: 0em; left: 0em;
   border: 1em solid red;
   border-top-color: red;
}*/
```

Bilan pseudo éléments

Animations

Texte de chargement

```
.loader {
 display : inline-block;
 white-space : normal;
 height: 1em;
 line-height : 1.5;
 overflow: auto;
 box-shadow : 0 0 0 .05em red;
.loader::before {
 display : inline-table;
 /*content: '0\a 1\a 2\a 3\a 4\a 5\a 6\a 7\a 8\a 9';*/
 /*animation: spin 5s infinite;*/
akeyframes spin {
 to { transform : translateY(-15em); }
```

```
.editable svg path {
   stroke: purple;
   stroke-width: .1em;
   fill: none;
   /*stroke-dasharray: 0;*/
   /*stroke-dashoffset: 0;*/
   /*animation: draw 4s linear;*/
}

@keyframes draw {
   to { stroke-dashoffset: 0; }
}
```

 display: block;
                                     display: block;
 position: relative;
                                     position: absolute;
                                     content: '';
 padding: .1em;
 width: 2em:
                                     top: 0.1em;
 height: 1em;
                                     left: 0.1em:
 background-color: #ccc;
                                     height: 1em;
 border-radius: 1em;
                                     width: 1em;
 border: medium solid #444;
                                     background-color: #fff;
                                     border-radius: 50%;
 transition: 0.4s;
                                     transition: all 0.25s;;
.switch:checked + label {
 background-color: green;
                                   .switch:checked + label::before {
                                     transform: translateX(1em);
```

```
.panel input[type=checkbox] {
    /* hide me */
}
```

Principe pour les onglets

```
<div class="tabs">
 <input type="radio" name="tab" id="home" checked>
 <input type="radio" name="tab" id="projects">
 <input type="radio" name="tab" id="about">
 <nav>
   <label for="home">Home</label>
   <label for="projects">Projects
   <label for="about">About</label>
 </nav>
 <div data-for="home">Home page</div>
 <div data-for="projects">Projects page</div>
 <div data-for="about">About page</div>
</div>
```

HTMC

Panel

```
details>
    <summary>Des détails
    Plus d'infos à propos des détails.
    </details>

details {
        border: medium solid
        border-radius: .25em;
        width: 100%;
}

details {
        border: medium solid
        border-radius: .25em;
        width: 100%;
}

details {
        border: medium solid
        border-radius: .25em;
        width: 100%;
}
```

Dialog

```
.editable dialog {
  border: medium solid rgba(0, 0, 0, 0.3);
  border-radius: .125em;
  padding: .125rem;
