- @ilaborie <https://twitter.com/ilaborie>
- igor@monkeypatch.io <mailto:igor@monkeypatch.io>
- Je ne suis pas un designer

<a href="https://www.w3.org/2001/tag/doc/leastPower.html">https://www.w3.org/2001/tag/doc/leastPower.html</a>

When designing computer systems, one is often faced with a choice between using a more or less powerful language for publishing information, for expressing constraints, or for solving some problem. This finding explores tradeoffs relating the choice of language to reusability of information. The "Rule of Least Power" suggests choosing the least powerful language suitable for a given purpose.

### Règles du jeu

- 1. Texte
- 2. HTML (sémantique) & CSS (layout, style, animations simples)
- 3. SVG (formes et animations complexes)
- 4. JavaScripts

... mais il y a toujours de bonnes raisons pour ne pas suivre ces règles

### Le CSS c'est vaste

- Selectors
- Box model
- Float
- Media Query
- Transitions
- Gradients

- Responsive Design
- Media
- Variables
- Colors
- Shapes
- ..

- I. Utiliser un pré-processeur?
- II. Unités
- III. Flexbox et Grid
- IV. Pseudo éléments
- V. Animations
- VI. Pseudo classes d'état
- VII. HTML
- VIII. Compatibilité des navigateurs
  - IX. Conclusion

# Utiliser un pré-processeur?

```
button {
   background: lightblue;
   border: medium solid purple;
}
button.danger { /*
   background: salmon;
   color: rebeccapurple; */
}
```

#### #8

#### Oui, mais privilégiez:

- le CSS
- les post-processeurs

- CurrentColor < https://css-tricks.com/currentcolor/>
- → background-origin

<a href="https://developer.mozilla.org/fr/docs/Web/CSS/background-origin">https://developer.mozilla.org/fr/docs/Web/CSS/background-origin</a>

◆ CSS Variables (aka Custom Properties)

<a href="https://www.w3.org/TR/css-variables/">https://www.w3.org/TR/css-variables/</a>

• ► CSS Color Module Level 4 <a href="https://www.w3.org/tr/css-color-4/">https://www.w3.org/tr/css-color-4/>

### Unités

CommitStrip.com

**→** CommitStrip <a href="http://www.commitstrip.com/fr/2016/10/10/a-story-about-css-units/">http://www.commitstrip.com/fr/2016/10/10/a-story-about-css-units/>

### Les unités de longueur

px, cm, pt,	longueurs ak	osolues (	(mesure p	hysique)
-------------	--------------	-----------	-----------	----------

em, rem fonction de la font-size

**ex, ch** hauteur d'un x, largeur d'un 0

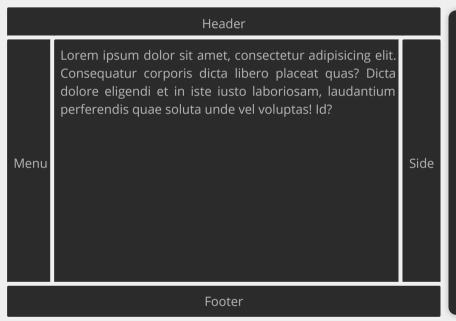

**vh, vw** (100vh, 100vw) = (hauteur, largeur) du

viewport

**vmin, vmax** min(1vh, 1vw), max(1vh, 1vw)

### Holy Grail avec calc

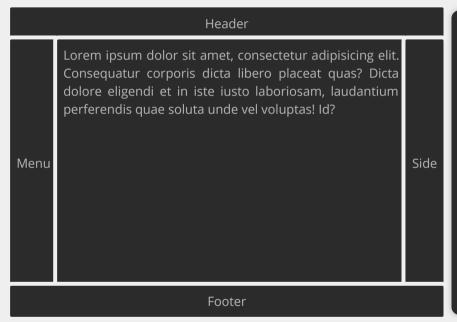

#### #13

- Unités <a href="https://developer.mozilla.org/fr/docs/Web/CSS/length">https://developer.mozilla.org/fr/docs/Web/CSS/length</a>
- Truc et astuces <a href="https://www.w3.org/Style/Examples/007/units.fr.html">https://www.w3.org/Style/Examples/007/units.fr.html</a>
- Calc <a href="https://developer.mozilla.org/fr/docs/Web/CSS/calc">https://developer.mozilla.org/fr/docs/Web/CSS/calc>

## Flexbox et Grid

```
<body>
<header>Header</header>
<div>
<nav>Menu</nav>
<main>Content</main>
<aside>Side</aside>
</div>
<footer>Footer</footer>
</body>
```

```
Header

Lorem ipsum dolor sit amet, consectetur adipisicing elit.
Consequatur corporis dicta libero placeat quas? Dicta dolore eligendi et in iste iusto laboriosam, laudantium perferendis quae soluta unde vel voluptas! Id?

Menu

Footer
```

#### **Flexbox**

### Pseudo éléments

### Le dinner d'un philosophe

```
.table {
  color: gray;
  font-size: 5em;
  /*content: '';*/
}
```

### Triangle avec des bordures

```
div.top, div.right, div.bottom, div.left {
   border: 1em solid transparent;
   display: inline-block;
   box-shadow: 0 0 0 .1em transparent;
}

div.top { border-top-color: transparent; }
   div.right { border-right-color: transparent; }
   div.bottom { border-bottom-color: transparent; }
   div.left { border-left-color: transparent; }
```

```
.popover {
   position: relative;
   background: teal;
}

/*.popover::before {
   position: absolute;
   z-index: 0;
   content: '';
   top: 0em; left: 0em;
   border: 1em solid red;
   border-top-color: red;
}*/
```

### Bilan pseudo éléments

### Animations

### Texte de chargement

```
.loader {
  display : inline-block;
  white-space : normal;
  height: 1em;
 line-height : 1.5;
  overflow: auto;
  box-shadow : 0 0 0 .05em red;
.loader::before {
  display : inline-table;
  /*content: '0\a 1\a 2\a 3\a 4\a 5\a 6\a 7\a 8\a 9';*/
  /*content: '"\a "\a "\a :\a :\a :\a :\a :\a :\a :\a :\*/
  /*animation: spin 5s infinite;*/
akeyframes spin {
  to { transform : translateY(-15em); }
```

```
.editable svg path {
   stroke: purple;
   stroke-width: .1em;
   fill: none;
   /*stroke-dasharray: 0;*/
   /*stroke-dashoffset: 0;*/
   /*animation: draw 4s linear;*/
}

@keyframes draw {
   to { stroke-dashoffset: 0; }
}
```

- :valid

```
.like input[type=checkbox] + label {
    box-shadow: 0 0 0 1px red;
}
.like input[type=checkbox] + label::before {
    content: '';
}
.like input[type=checkbox] + label::before {
    content: '';
}
.like fieldset input[type=checkbox] { opacity: 1; }
```

```
.switch + label {
                                   .switch + label::before {
 display: block;
                                     display: block;
 position: relative;
                                     position: absolute;
                                     content: '';
 padding: .1em;
 width: 2em:
                                     top: 0.1em;
 height: 1em;
                                     left: 0.1em:
 background-color: #ccc;
                                     height: 1em;
 border-radius: 1em;
                                     width: 1em;
 border: medium solid #444;
                                     background-color: #fff;
                                     border-radius: 50%:
 transition: 0.4s;
                                     transition: all 0.25s;
.switch:checked + label {
 background-color: green;
                                   .switch:checked + label::before {
                                     transform: translateX(1em);
```

```
.panel input[type=checkbox] {
    /* hide me */
}
```

### Principe pour les onglets

```
<div class="tabs">
 <input type="radio" name="tab" id="home" checked>
 <input type="radio" name="tab" id="projects">
 <input type="radio" name="tab" id="about">
 <nav>
   <label for="home">Home</label>
   <label for="projects">Projects
   <label for="about">About</label>
 </nav>
 <div data-for="home">Home page</div>
 <div data-for="projects">Projects page</div>
 <div data-for="about">About page</div>
</div>
```

### HTML

```
<details>
                                  details {
  <summary>Des détails</summary>
                                    border: medium solid currentcolor;
 Plus d'infos
                                    border-radius: .25em;
   à propos des détails.
                                    width: 100%;
</details>
                                  details summary {
                                    background: #888; color: #eee;
```

## Dialog

```
.editable dialog {
  border: medium solid rgba(0, 0, 0, 0.3);
  border-radius: .125em;
  padding: .125rem;
  box-shadow: .25em .25em .125em rgba(0, 0, 0, 0.42);
}

/* .editable dialog::backdrop {
  position: fixed;
  top: 0; right: 0; bottom: 0; left: 0;
  background-color: rgba(0, 0, 0, 0.8);
} */
```
